

Year 3 & 6 – Torches Project

As you may already be aware, the children in Years 3 & 6 are working together on a designing and making project around torches – linking parts of the Science and Design Technology curriculum.

In order to realise their ideas, each child will need to gather materials for their torch and bring them in to school for our making session on **Friday 9th December**.

For the body of the torch, some kind of cylindrical or conical structure would be ideal (e.g. kitchen roll tube, polystyrene cup); it must be spacious enough for a circuit to fit inside (we will make these in school). Your child might like to bring in additional materials to cover the body of the torch and for decoration.

The school will provide all other materials including batteries, bulbs and wires.

Thank you in anticipation of your support.

Mr Frost & Miss Varden
