

HEADLICE

Please note that we have had a case of headlice reported in the school today. We would therefore advise you to check your child's hair and carry out treatment if necessary. Your pharmacist or GP will be able to advise you on the current recommended treatment.

HAND, FOOT & MOUTH

We have also had a case of hand, foot & mouth reported today. This can appear as blisters in the mouth and/or rash on hands and soles of feet. If you have any concerns please contact your local medical centre and they will be able to advise you.
